

Lemon Cheesecake

Base

1 oz butter or margarine
2 ozs crushed digestive biscuits

Topping

8 ozs soft cheese full or half-fat (Philadelphia)
8 ozs condensed milk
4 ozs double cream (or substitute e.g. Elmlea)
2 lemons - grated rind + juice

Method

- 1 Melt the butter. Stir in the biscuits and line the base of a tin or flan dish. Leave to cool
2. Cream the soft cheese until smooth, dropping consistency.
- 3 Combine the condensed milk and cream in a bowl / jug, then add gradually to the cheese. The mixture will be quite runny.
4. Add the grated rind and then the juice from both lemons.
5. Pour the mixture on to the base. Smooth the top and refrigerate.

This can be frozen.

I vary the quantities accordingly for different numbers of diners and usually make it the day before it's needed, e.g. 10 digestives, 2-3 ozs butter, 3 or 4 large lemons to serve 6-8 people.
